## INTRODUCING SANTUS™ VIBRA

*A New Lifestyle Experience For Wine Lovers*

*The must-have intelligent wine companion that's perfect for every modern space*

SINGAPORE, April 2024 – Following the Andante's success in winning the prestigious 2023 IF Design Award, SANTUS™, a pioneer in wine lifestyle innovations, proudly introduces the Vibra which launched in November 2023. This fourth-generation smart wine dispenser, a testament to the ongoing excellence of Vino Fontaine, redefines the art of wine preservation with its blend of elegance, cutting-edge technology, and commitment to sustainability. Designed to captivate and cater to the needs of wine aficionados, the Vibra arrives as a symbol of innovation, just months after the Andante set new standards in the industry of wine enjoyment.

Under the visionary leadership of CEO & Founder Terence Tan, the Vibra was developed to enhance and extend the wine drinking experience. Leveraging patented oxygen absorption technology, the Vibra promises to keep your wine fresh for up to 14 days after opening, ensuring each glass is as vibrant and flavorful as the last. "The creation of the Vibra was driven by our desire to offer wine lovers a product that not only preserves wine flawlessly but does so with an unparalleled level of style and sophistication," Tan remarks.

Echoing the sleek aesthetics of its award-winning predecessor, the Vibra is an epitome of modern design. This philosophy ensures that the Vibra is not merely a functional appliance but a statement piece that enhances any environment—from the kitchen counter to the executive boardroom.

Distinctively, the Vibra is offered in four enchanting colors: Olive Mist, Pearl Glow, Ruby Red, and Sky Blue, allowing it to seamlessly integrate into diverse interior designs and personal preferences. This strategic move from offering multiple models to a singular, versatile product in various colors underlines SANTUS™'s focus on personalization and aesthetic appeal which allows various bottles sizes to fit seamlessly.

The launch of the Vibra is yet another milestone in SANTUS™'s journey, symbolizing not only a step forward in wine technology but also a commitment to reducing wine wastage globally. With millions of bottles of wine lost annually due to improper preservation, the Vibra offers a sustainable solution, ensuring that every sip is savored, and no drop goes to waste.

Experience the pinnacle of wine preservation with the SANTUS™ Vibra. Visit [www.mysantus.com/product/santus-vibra](http://www.mysantus.com/product/santus-vibra) today to discover how the Vibra can transform your wine enjoyment into an exquisite, enduring pleasure.
